

Visitor Management System
www.ezvzit.com

A Cost-Effective Cloud Visitor Management System with Health Screening Feature

Protect your Visitors & Staff

Lets visitors register the entrance records using their own smart phone and remove the paperwork for manual registration. Help your visitors and staff practice social distancing, to minimize the safety risks.

How Does it Work?

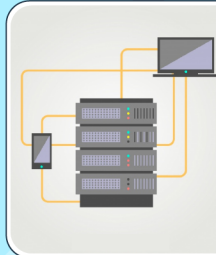

STEP 1

Premise visitors required to scan the QR code and fill-up the needed information.

STEP 2

The receptionist will take the reading of the visitor's body temperature before entering the premise.

STEP 3

The records are then saved into the cloud server which can retrieve with full reports anytime and anywhere.

MICRO

RM **29** / Month

Up to 1,000 visitors per month

Billed Quarterly

SME

RM **79** / Month

Up to 3,000 visitors per month

Billed Quarterly

CORPORATE

RM **199** / Month

Up to 10,000 visitors per month

Billed Quarterly

Enhance company marketing using your visitor database

Benefits

- **Contactless Self-Input System:** Premise visitors are asked to scan the QR code posters, by using the camera function on their mobile phones.
- **Traceability:** All the recorded visitor's information is retrievable by the company in case of a positive case of Covid-19 on any particular date and time.
- **Accountability:** The SOP required by the government is followed accordingly by the companies which can be proved by recorded data and reports.
